Having fun while waiting for the medals

Once the contest was over, it was time for the guests to relax. After a trip to the Dracula castle and, for some, a night out, the contestants had difficulties waking up the next morning. When they finally did it, recreational activities were waiting for them at the *Liviu Rebreanu* National College. First, they attended a presentation given by the representatives of [Microsoft](#) Romania and then, since the weather has improved dramatically over the last two days, they could do some sports on the football fields in the college yard.

In spite of the fact that these activities were quite demanding, they found the strength to attend a show carefully prepared for them by a group of teachers in the festivity hall. The show began with a

presentation of our country that illustrated the main tourist attractions and the diversified relief (the [Carpathians](#), which dominate the centre of the country, offering outstanding [landscapes](#)), the [Danube Delta](#), the [Black Sea](#) and many others. Thus, the guests learned more about our country and who knows, some of them might even choose to come back one day and travel around it.

The show then continued with German dances and the engaging performance of a group of cheerleaders, after which a band, made of students

of our college, played various songs and entertained the audience through their jokes and singing. The guests could then watch more dancing, among which flamenco, sporting dance, traditional dances and even Bollywood, which they enjoyed very much.

All in all, the time that the contestants spent at our school was a pleasant one, the applauses and cheering at the end being an undeniable proof.

Weather forecast
for tomorrow

Sky: partially cloudy

Max Temperature: 32 C

Min Temperature: 19 C

Humidity: 46%

Important faces

**Ovidiu
Crețu**

- Mayor of Bistrița City
